

Satellite IP Multicast Service

NovaCast-IP

The *NovaCast-IP* service has been designed to provide your business with its own private information, satellite communications network. It enables you to distribute multimedia information, at data rates as high as 6 Mbits/s, to your branch offices and to your customers' locations.

Data File Distribution

Using the *NovaCast-IP* service, you can distribute time sensitive, large data files, from your central location, directly to multiple remote sites.

- Transmit information directly to desktop PC's
- Transmit information, simultaneously, to an unlimited number of sites
- Choose your transmission priority
- Maintain files at a central location
- Secure Data Encryption

Internet / Intranet Access

The *NovaCast-IP* service provides you an ideal platform on which to build your own corporate Intranet. If you are an ISP, it enables you to offer fast Internet access as a premium option to your customers. Connect to your Intranet or to the Internet via normal dialup connection and files are downloaded via the high speed satellite circuit.

- Uses standard DVB/MPE, TCP/IP, UDP/IP and IP Multicast protocols
- Choose your satellite down-load speed, 256 Kbits/s to 4 Mbits/s
- Use a dedicated or a shared satellite circuit

The *NovaCast-IP* service rates are based upon the data throughput and speed requirements of your network, which can be tailored to meet your specific needs.

Business Television

With the aid of Streaming Video technology, you can use the *NovaCast-IP* service to create your own Corporate Business Television network.

- Broadcast to multiple locations or to targeted locations
- Ideal for Corporate Long Distance learning
- Management briefings
- Promotional events for employees and customers
- Select your own transmission schedule
- Use a dedicated or a shared satellite circuit
