

Satellite Digital Data Service

NovaCast-Data

Novanet Communications has a ten year history of delivering high quality time sensitive data to Radio Stations, Television Stations, Cable Television head-ends, Paging Network Transmitters, Retail Stores and many other types of locations.

Dedicated Data Channel

Using your own *dedicated data channel*, *NovaCast-Data* allows you to efficiently and economically:

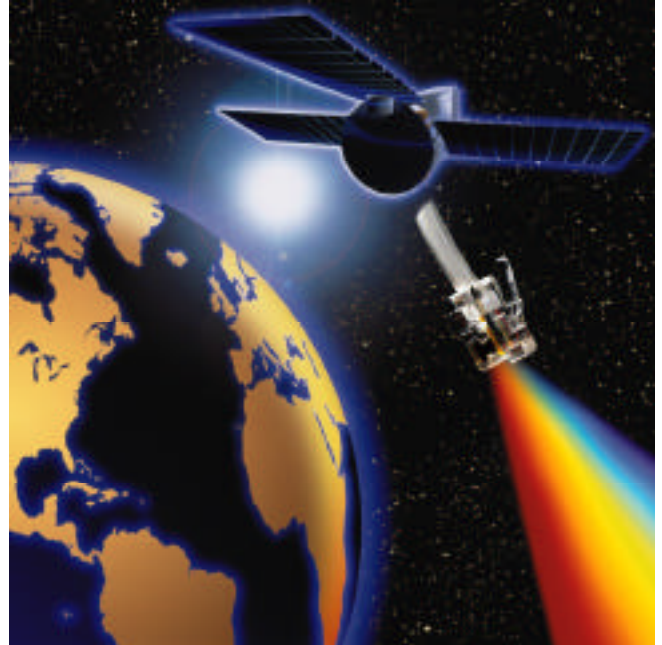

- Broadcast real time data
- Distribute large data files

All to your own universe of remote sites.

Synchronous or Asynchronous Data

NovaCast-Data allows you the choice of either Asynchronous or Synchronous data transmission protocols. The satellite receivers are remotely addressable and provide the following specifications:

- DVB/MPEG Compliant
- Frequency Agility
- Asynchronous Data transmission from 1.2 kbps to 38.4 kbps.
- Synchronous Data transmission from 64 kbps to 8 mbps
- Customizable Forward Error Correction

Customized Network

If you need to distribute large data files or real time data, such as stock quote information, paging information or news, to multiple remote sites, the *NovaCast-Data* service can be customized to meet your specific requirements.

The *NovaCast-Data* service rates are based upon the Data Rate Speed requirements of your network, which can be tailored to meet your specific needs.
