

Solutions for Media Broadcasting

We understand how media broadcasters rely on the fastest technologies to deliver the news to multiple platforms. Whether it is news content for television, radio, newspapers or websites, and when accuracy and security are critical, Novanet Communications has the right solutions.

- develop point-to-multipoint distribution of multimedia information
- high-speed service allows control of your network using the latest in world standard technology
- manage and maintain distribution systems via satellite real-time audio and IP-based news and photos to hundreds of television stations, radio stations, cable headends and newspapers
